

CLEANCOAT

Hotel – Conference Centre

Lisegaarden Hotel & Conference centre in Liseleje, Denmark.

We are housed in an old three-wing farmhouse which over time has been used as a guesthouse since the 1920's, as a hotel since the 1960's and the last 50 years as a hotel and conference center. We have 39 rooms and 7 conference and meeting rooms.

Our challenge for many years has been the growth of mould in the bathrooms of many of the rooms, which we manage to hold down by frequent cleaning and the use of various harsh detergents. In addition, we have a conference room that smells "old" and a meeting room, we have had to close down completely.

The use of chemicals is not in line with our vision of being green and environmentally conscious. However, it has been necessary. At least until now!

Friday, May 9, 2014 we got our rooms and conference areas sprayed with the environmentally friendly Advanced CleanTech product, CleanCoat and our challenges have disappeared.

The mould is gone. The unpleasant smells are gone. All our rooms and conference rooms are in use and can be hired out.

Our cleaning costs are reduced, but what makes us even more pleased - we no longer need to use various chemicals or harsh detergents.

We can only recommend the use of ACTs' CleanCoat for treatment against mould and bad smells
